Outcome Indicators									
Outcome Indicator Number	Standard Indicator	Custom Indicator	Baseline Value	Baseline Year	Baseline Source	Required Disaggregation	Responsible PR	Country	Comments
1	Malaria O-1a: Proportion of population that slept under an insecticide-treated net the previous night		50.3%	2016	Survey	Gender	United Nations Office for Project Services (UNOPS)	Lao PDR	The last bed net survey was done in 2016 and the sample contained over 2,000 people in 360 households of 30 villages in six districts of three southern provinces (Champasak, Sekong and Attapeu). The survey result showed that 50.3% of the total population in the surveyed households slept under ITN the night before the survey. The next target is now set at 90% to be reported in 2019. The result for this indicator will be available from UNICEF's Lao's Social Indicator Survey (LSIS) which will be collecting the data from more than 20,000 household in all 18 provinces in the country. The data collection for this survey will happen in the 2nd half of the year 2017, the preliminary result will be available by the end of 2017 and the final report by early 2018. RAI2E will take the data from this survey to report the indicator result in 2019 1st PUDR. Numerator: Number of individuals who slept under an ITN the previous night Denominator: Total number of individuals who spent the previous night in surveyed households
2	Malaria O-6: Proportion of households with at least one insecticide-treated net for every two people		N/A				United Nations Office for Project Services (UNOPS)	Lao PDR	There is no baseline data availabe for this indicator. The target for this indicator is set at 100% to be reported in 2019. As the indicator intends to show the bed net ownership, the target is made higher than the LLINs usage target which is 90%. The result will be taken from UNICEF's LSIS report. Numerator: Number of households with at least one ITN for every two people Denominator: Number of households surveyed
3	Malaria O-7(M): Percentage of existing ITNs used the previous night		N/A				United Nations Office for Project Services (UNOPS)	Lao PDR	There is no baseline data availabe for this indicator. The target for this indicator is set at 95% to be reported in 2019. As the indicator intends to show both the bed net ownership and the usage, the target is made in between first 2 indicators' targets. The result will be taken from UNICEF's LSIS report. Numerator: Number of ITNS used for sleeping the previous night in the surveyed households Denominator: Total number of ITNs listed in the surveyed households
4	Malaria O-9(M): Annual blood examination rate: per 100 population per year (Elimination settings)		7.92%	2016	HMIS	Case detection	United Nations Office for Project Services (UNOPS)	Lao PDR	Baseline data from 2016 showed that 7.9% of the total population living in risk areas (strata 2 and 3) were tested for malaria. The ABER target is set at 9%, 9.8%, 11.4% respectively for 2018, 2019 and 2020. These are the ambitious targets as the country is aiming for higher number of testing towards the targeted years for elimination. 2018 target is the 14% increase from 2016; 2019 target is the 9% increase from 2018 and 2020 target is 16% increase from 2019. Numerator: Number of persons receiving a parasitological test for malaria (microscopy or RDT) Denominator: Population at risk (number of people living in areas where malaria transmission occurs) which will be strata 2 and strata 3
